EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

a) In the Title

After "same", insert --Including Adding Metallic Element to the Amorphous Semiconductor Film and Introducing Oxygen after Crystallization"

Reasons for Allowances

The following is an examiner's statement of reasons for allowance: Moon (274) teaches implanting oxygen for crystallization. Nakajima (282) teaches the oxygen concentration only as an incidental, but not purposely introduced. Neither has the features in claim 2, lines 8-14, "a fourth step of introducing oxygen into the semiconductor film having a crystalline structure to make the oxygen concentration within the film from $5 \times 10^{18}/\text{cm}^3$ to $1 \times 10^{21}/\text{cm}^3$; a fifth step of removing an oxide film on the surface of the semiconductor film having a crystalline structure, and a sixth step of irradiating laser light under an inert gas atmosphere or in a vacuum to level the surface of the semiconductor film having a crystalline structure." The prior art of record fails to teach, in combination, the process features.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
